Academic Linkages

Cortland seeks companies that will provide students with experiences and jobs in the related field of the company. The specific students that will be affected come from the departments of graphic design, biochemistry, biomedical, communications, business economics, geographical information science, geological sciences, health, sociology, recreation, parks and leisure, kinesiology, physics, and sport studies and sports management.

Community and Economic Benefits

Increased employment opportunities (priority given to companies projected to help Cortland residents or displaced workers)

Internships vocational training, and experiential learning available to undergraduate and graduate students

Diversifying the local economy socioeconomically and through different types of businesses

Entrepreneurial opportunities will be increased

Use of goods and services that are produced regionally

Positive effect on the local economy from increased investment, a trained workforce, and occupying vacant space in the region

Possibility of other business locating to the Cortland area due to the presence of new businesses
